

Waste management and environment Improvement measures to ensure a sustainable Green campus.

- Solid waste: Generated solid waste is collected and separated during inception as Bio-degradable waste, Non Bio-degradable waste and E-waste separately.

Degradable waste is used as manure to plants in the campus.

Non Bio-degradable waste and E -waste will be collected through external Agency shortly there will be MOU for this.

- Liquid waste: liquid waste connected to STP and treated water is used for gardening.
- Promoting plastic free zone inside the campus.
- There are 1000+ trees in the campus with more than 30 varieties.
